G-Vision

It has been brought to our attention that some GPlayers, when inserted into a computer, display a virus alert. **BE ASSURED ALL GPLAYERS ARE TESTED AND SHIPPED VIRUS FREE.** Norton Anti-Virus 2010-2011 and McAfee for MS Windows alerts a **FALSE POSITIVE** virus when a GPlayer is plugged into a USB port. It is **NOT A VIRUS** but a software bug between the compiler, Norton Anti-Virus 2010-2011 and McAfee. We have since rewritten and recompiled the GPlayer software so a virus alert should not be displayed.

G-Power

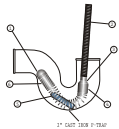

Please call or email gplayer@eplsolutions.net if you have any questions or concerns. We apologize for any inconvenience this may have caused.

Regards,

John Bartucciotto
